

(Name) CLP notes that:

1. The UK will leave the European Union on March 29th 2019 if a majority of MPs vote for the EU Withdrawal And Implementation (WAI) Bill
2. The Labour Party campaigned for Remain in the 2016 referendum and has a long history of supporting full membership of the EU
3. The majority of voters aged 18-35 year old voted to Remain in the EU

(Name) CLP believes that:

1. If the UK leaves the European Union, our country will be poorer, have diminished influence in the world and the greatest burden will fall on the poorest and youngest in society
2. Since the referendum result, several promises by the Leave campaign, including the claim that an additional £350m would become available for the NHS upon leaving the EU, have been shown to be wildly optimistic or false
3. In a democracy, people should have the right, and the opportunity, to change their minds when new information becomes available
4. There is clear evidence that a majority of both Labour Party supporters and younger voters are opposed to Brexit
5. That the strong 2017 General Election result achieved under the leadership of Jeremy Corbyn means the votes of Labour MPs will have a decisive impact on the trajectory of Brexit
6. It is now clear that no form of Brexit can meet Labour's six tests

(Name) CLP resolves:

1. The Labour Party should give the British people the opportunity to have the final say, by:
 1. Voting against the Withdrawal Agreement and Implementation (WAI) Bill
 - AND
 2. Supporting a referendum on the final terms of the exit deal, with an option to remain full members of the European Union
2. Our delegates to Party Conference in 2018 will vote in favour of any motion that aligns with this resolution
